

New & Exclusive to Sussex Permanent Makeup

Beautiful and Natural Looking Eyebrows just for Brunettes!!

By Katy Jobbins

**Head Trainer Permanent Makeup Training Academy,
Sussex Permanent Makeup & Harley Street
Permanent Makeup**

Perfectly defined Eyebrows are a major part of being a brunette and it's very important always have them perfectly groomed.

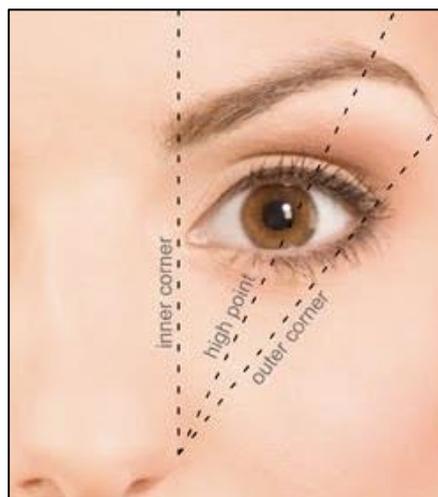

**The eyes may be the window to the
soul, but the eyebrows are their
frame.**

Groomed brunette eyebrows will transform how you look by opening your eyes and lifting your whole face.

Most brunette and Asian women's eyebrow hairs tend to be coarse and sparse which, if they have absolutely any imperfections are so noticeable against dark hair.

This is why I take a completely different approach to applying permanent eyebrows to a brunette.

The brows need to be dark enough to fit in with the hair, skin tone and eye colour, but applied in a very specific way that they look completely natural and do not end up looking like a clown.

Even some of the most expensive eyebrow pencils, paints and powders on the market today are way too dark and can look quite

blocked in and unnatural. This makes drawing your eyebrows on not only very difficult, but also quite daunting.

GOOD NEWS!!!

**...I have spent years developing a new
permanent brow enhancement technique...**

...exclusively for brunettes!

Using only the natural simulated hair stroke effect, alongside a bespoke marbling service, I am now able to create multi-tonal colours designed specifically for brunettes. It's almost like highlights for your eyebrows!

**This new technique guarantees a
completely natural, perfectly
defined result for those with
brown hair.**

My new and exclusive multi-tonal marbling treatment adds definition to the eye area, whilst perfectly re –shaping your eyebrows using the best quality (the same pigment that Harrods technicians use) natural, hypo allergenic and organic pigments to match your exact hair colour. All our pigments are designed to fade over time so as your hair colour changes, so can your eyebrow colour.

For this technique, I match two or three tones in your own natural hair colour to our permanent make up pigment.

I will then use a marbling pallet designed with colours, just for you, creating a caramel base and then at random implanting all the colours of your hair. My method is to ***'air on the side of caution'***, so I always intentionally start with too light a colour.

“It’s easy to add more colour at the top up stage. It’s much harder to take it away.”

You return to me in 6 to 12 weeks so I can check that the shape and colour have healed in perfectly. At this appointment I will add lowlights of a slightly deeper colour creating a 3D natural hair stroke effect for brunette hair.

There is no extra charge for this top up appointment

My exclusive new treatment has been extensively trialled on many brunettes, with huge success.

To see exactly what my clients think of their new eyebrows visit:

& click play to hear what they think.

So, what kind of result can you expect?

Take a look at the 3 beautiful brunettes on the front cover of this report.

Hollywood superstars Megan Fox, Anne Hathaway and Kate Beckinsale, who all boast perfectly natural and defined eyebrows that match their brunette hair.

Save yourself 20 minutes every day drawing in your eyebrows & making sure they are even. For many brunettes, this is an extremely tedious process especially if you have to do it every day for the rest of your lives. Never have the worry about rubbing your brows off in public again & smearing them across your face.

– They will simply look perfectly groomed and natural day in day out!

Your new eyebrows will be so light and feathery that only you will know your new secret!
